

Relevant research indicates that "the development of technologies affects folklore, and student jokes are moving to the virtual space. New themes, related to the development of science, emerge, these themes were impossible in the time when there were, let us say, no computers or no knowledge about quantum physics or similar matters...In terms of content, the jokes and anecdotes in Internet portals continue such topics as shortage of money resources, exams and sessions" (Muktupavela, 2018,p. 10). "Digital humor can have six forms of presentation, namely interactive humor, funny photos, manipulations, phanimation, celebrity soundboards, and PowerPoint humor" (Shifman, 2007, p180). With the development of .technology devices and society's knowledge, jokes are implemented in new ways and new themes
