

Enterprise Environmental Factors (EEFs) and Organizational Process Assets (OPAs) are concepts used in project management, particularly in frameworks like the PMBOK (Project Management Body of Knowledge). Internal Factors: Organizational culture, existing processes, infrastructure, employee skills, and resource availability. EEFs can include: External Factors: Market conditions, regulatory requirements, cultural influences, political climate, technological trends, etc. Here's a brief overview of each: Enterprise Environmental Factors (EEFs) EEFs are external and internal conditions that influence a project's success. Both EEFs and OPAs are crucial for effective project management as they provide context and resources for project teams to leverage in their work.
