

I am delighted to recommend Dr. Eman Taha for the position of Assistant Professor in the Physics Department at Kuwait University. Dr. Taha has made significant contributions to our lab at the Polymer Nanocomposite Center of Excellence, where her research has focused on polymer-based nanocomposites with applications in sustainable materials and environmental resilience. Through her efforts, Dr. Taha has established herself as a specialist in polymer nanocomposites, contributing to multiple high-impact publications and presenting at international conferences. Moreover, Dr. Taha's contributions extend beyond technical skills; she brings a collaborative spirit and leadership qualities that motivate those around her, making her a key member of our research projects. Furthermore, Dr. Taha's collaborative research with the University of New Mexico has enriched her academic perspective and commitment to international initiatives, highlighting her dedication to advancing materials science. Her expertise in polymer nanocomposites and sustainable materials aligns well with Kuwait University's vision for research excellence and interdisciplinary innovation. Dr. Taha's dedication to academic excellence is evident in her teaching and mentorship at EPRI, where she bridges theory with practical applications.
