

Dear Amna I have just returned home from an exciting trip to Australia and visiting the National Museum of Australia was one of the fabulous activities of this tour. The entry fee was \$15 but I was lucky to get a free pass from one of my colleagues. Finally, the display figurines from Moenjodaro in Sindh province, pottery pieces and Stone Age artefacts are worth observing. Among other things, it exhibits the first-ever constitution drafted for our country, the first-ever proposed national anthem that was handwritten by Sir Syed Khan. We stayed in Australia for a week and on our second day, we went to the National Museum of Australia, located on Acton Peninsula, next to the Australian National University in Canberra. Last Thursday, my dad and I decided to take a trip to the Quetta Museum, a stunning Archaeological Museum, located on Steward Road, Balochistan. The museum's stunning architecture offered me an extraordinary opportunity to explore the rich and diverse stories of Australia and its people. The museum is full of historical artefacts relating to the period before the separation of Pakistan and India. The first floor displays the extinct animals, skeletons of dinosaurs and the history behind their extermination. Kiosks are placed on all floors which provide extensive information about the displayed items. It also showcases the wax sculptures of many legendary figures and the founding father of our country. After observing all these artefacts, I am filled with even more respect for our ancestors as they had sacrificed a lot in order to gain independence for us. I say we should catch up some time soon and visit this museum together. I learned that theories based on the abacus were further expanded to enhance this technology. The museum's innovative use of new technologies is unprecedented. From pre-colonial settlement to modern Australia, the museum has it all. The Pearling exhibition was excellent from a historical perspective. It was as if I time travelled to the pre-partition era! This museum is visited by a large number of local citizens and international tourists. The ground floor displays the invention of robots, with many robots on display and details on how they were developed. Initially, I thought that it's not going to be a fun time but to my surprise, I actually got fascinated by the fabulous collection the museum has. The museum is divided into 4 galleries and each has many glass cases filled with stories. The Entrance and the interior blew my mind away. The experience was stunning. Yours truly, Sara Dear Amna Hope you are doing good. Warm wishes, Sara Dear Amna Hope this letter finds you in good spirits and health. As you are aware, I am currently in Chicago for a month for some professional work. The second floor has a shop where you can buy books and souvenirs. It was a great learning opportunity and a fabulous experience that I will cherish for a long. I wish you had been with me when I visited the museum. I cannot wait to share my experience with you. I wish you had been with me there. I would absolutely recommend you visit this museum whenever possible. I would like to meet you soon and tell you stories about my tour. Take care. I have something very interesting to share with you and that is why writing to you today. He wanted me to learn more about the history of our country and this museum was a perfect place to start with. Honestly, it felt amazing. I am writing this letter to share my experience of visiting the 'Science Museum' in Chicago Downtown, which I thought you would enjoy. This was quite interesting. Why don't you write me back about things you have done recently and enjoyed? Warm wishes, Sara
