

The purpose of this study is to investigate the learners' perception on online learning in the midst of a COVID-19 pandemic. A thematic analysis was employed in the current study. Thus the pandemic of covid-19, the researcher interviewed the learners by calling them by using WhatsApp application. The study showed that the learners' perception on online learning reveals that it is good in the midst of COVID-19 pandemic. This study not only report that online learning is good in the midst of COVID-19 pandemic but also spotted the light on the availability of internet access, financial issue, and online learning implementation. It implied that the material and instruction implemented by the lecturer in the online learning were not easy to use. At the learners' condition in terms of financial issue, they hope that lecturers make use of facilities such as free Messenger application in Online Learning System. In the light of the availability of internet access, they said that individual tasks are better to keep the distance physically due to pandemic, they need group tasks to help friends who do not have an internet pulse and access. This research applied qualitative method. The subject of this research are the learners of English study program of UKI Toraja. They perceived online learning is very helpful in the middle of pandemic. Thus, they recommended that Voice Note will be effectively used when giving instructions. The instrument used is semi-structured interview. About the implementation, they hope that material and .assignment must be preceded by explanation
