

Sultan Haitham City, a planned city in Oman, is designed to serve several key goals in terms of urban development, sustainability, and economic growth. Cultural and Heritage Preservation: While modern in its approach, Sultan Haitham City also seeks to preserve Oman's rich cultural and heritage values, incorporating traditional designs and practices into its architecture and public spaces. Some of the primary objectives of this ambitious project include: Economic Diversification: Sultan Haitham City aims to contribute to Oman's Vision 2040 by diversifying the economy away from its reliance on oil and gas. Sultan Haitham City will incorporate green spaces, renewable energy sources, and sustainable urban planning principles to reduce environmental impact and promote a high quality of life for its residents. Modern Infrastructure: The city will feature advanced infrastructure with modern transportation networks, utilities, and smart city technologies to ensure efficiency and connectivity. This includes residential, commercial, and industrial areas.
