

Hello, my name is Rawia Zekry Mohammed. I am a second-year Pharmacy student, pursuing a¹. Pharm D-clinical degree, at Minia National University, expected to graduate in 2028. I am based in Kafr Elsheikh. I have gained practical experience as a community pharmacist at Mohammed Gamal pharmacy in Kafr Elsheikh. I also co-operated with a doctor to organize a successful free medical event, where I measured blood pressure, sugar, and weight for over 300 patients with chronic diseases, and provided awareness and information about drugs and their side effects. I have strong communication and organizational skills and am actively involved in student activities like EPSF – Minia Branch as a Local Officer Candidate and Public Engagement Member. I am seeking to gain hands-on experience through training or internships in the pharmaceutical field, with a focus on community pharmacy, sales, and healthcare marketing."(Alternatively, you could mention her role as an organizer for the PHOCUS .Event or Oncology Event, highlighting the responsibilities and successful outcomes.) 3.2
