

My mistake Everyone in the world has friends. I was ignoring the exams and trying to escape from the studying stress. I enjoyed going with them however I failed in the exams. At first, I liked my friends so much. At the same moment, I did not realize that I suppose to not waste my time with friends, yet I should study for the exams that were in one week. When the exams started, I tried all my best to study without a hope. In end, I failed in four subjects out of six which was hard to me at that time. Finally, I decided to change my life style to avoid such mistake. I decided to not see friends at all in the exams and instead of seeing them I would study. Friends are the thing that make life better place, but sometimes it makes it worse. Two years ago, I used to go out with friends. they are funny, wild and wild. I enjoyed playing with them. Whenever I was under stress from studying, I went out with my friends. I could not find enough time to study. The stress was more than before so studying with stress is not good. I did all my .best, but it was a hopeless try. That was a hard lesson that I have learned in my life
