

When choosing an asset management company and the type of mutual fund in Oman with an investment of OMR 5,000, I will take into account several factors: 1. Last Response: o Asset Management Firm: Bank Muscat (or comparable respectable firms). o Mutual fund type: balanced fund, such as the Bank Muscat Balanced Fund, because of its stability and development potential. This type of fund is suitable for investors with moderate risk tolerance, as it provides a balance between stability and growth, and achieves medium returns while reducing volatility in the medium to long term. **Asset Management Company**: Asset Management at Bank Muscat is one of the leading and trusted companies in Oman, as it is the largest asset manager in the country and has a strong reputation for managing investment funds, including equity, fixed income and balanced funds. Other well-known companies include Bank of Dhofar, National Bank Asset Management, and Oman Arab Bank. 2
