

If you think of the jobs robots could never do, you would probably put doctors and teachers at the top of the list. British educationn expert Anthony Seldon thinks so. And he even has a date for the robot takeover of the classroom: 2027. It's easy to imagine robot cleaners and factory workers, but some jobs need human connection and creativity. He predicts robots will do the main job of transferring information and teachers will be like assistants. Intelligent robots will read students faces, movements and maybe even brain signals. It's not a popular opinion and it's unlikely robots will ever have empathy and the ability to really connect with humans like another human can. That problem could be partly solved by robots because they can teach anywhere and won't get stressed, or tired, or move somewhere for an easier. Those negative aspects of teaching are something everyone agrees on. Teachers all over the world are leaving because it is a difficult job and they feel overworked. One thing is certain, Uthough
