Strange Things Sometimes Happen When I was young . I used to go the roof every night and spend many hours staring in the sky . Once I was with friends of mine sitting on the roof and staring to the sky . Suddenly , we saw a very strong light in the sky . It was strange and amazing at the same time . We got scared so we could not sleep well like before . Another day night , I went to the roof and while I was . staring on the sky , I saw the light another time . That happened with me many times
