

youcef.boukhalfa@gmail.com Hi Youcef, E I hope this email finds you well. At university, I'm thinking of studying either computer science or mechanical engineering. In my free time, I usually play football with my school team. It's also highly respected for its universities and innovative industries. The city is quite lively, with lots of music festivals, exhibitions, and sports events happening throughout the year. I'm currently in my final year of secondary school in the United Kingdom. Manchester is a very large and diverse city in the northwest of England. My dad is a doctor at a local hospital, and my mum teaches English at a secondary school. Neither my dad nor my mum works from home, but they are always at home in the evenings and always make time for us. Emily is 10 years old and very curious, while Adam is 19 and studying engineering at university. It's extremely popular for its football teams especially Manchester United and Manchester City. I'm writing to you so that we can get to know each other better and become friends. My name is James Thompson, and I'm 16 years old. On weekends, I sometimes help my mum with cooking or go out with friends. I live in Manchester with my parents, my younger sister Emily, and my older brother Adam.
