

The Public Prosecution had received a notification to find 7 deceased from one family inside their home, and its members moved to discuss the bodies and inspect the crime scene, and the Public Prosecution assigned the doctors of the Forensic Department to conduct the anatomical status on the bodies, and experts of the forensic laboratory to remove the effects from the crime scene, and also requested the investigations of the investigation of the incident, its conditions and its circumstances. Investigations said that the sixth witness, "Mohammed Marei – Onch bleach," admitted to the presence of the accused before the incident was committed, and asked to participate in the theft of cattle and that he saw a white weapon in his possession, but he rejected his request. The sayings of the seventh witness, "Rajeh Abdullah – 35 years old – a forensic doctor," came that by his anatomy for the body of the first victim, it was found that the cause of death was the total stabic and severe injuries and the accompanying burns, and the consequent non–returned hemorrhagic shock, and the neurological trauma associated with the burns, and his injury may be obtained according to the confession of the accused and from the exact white weapon, and that the autopsy of the body of the second victim, has resulted in that the cause of death is the severe traumatic injury to the head and the resulting fire, neurological shock and suffocation, as a result of the burns, and it may be injured according to the confession of the accused, and from the exact white weapon, also that the autopsy of the body of the victim On it, the third resulted in that the cause of death was vital firearms burns, and the accompanying neurological trauma and sophexia, and also that the autopsy of the body of the fourth victim, resulted in the cause of death was the stabbed injury in the chest and the accompanying non–returned haemorrhagic shock and neurological trauma as a result of the burns and suffocation ephexia, and his injury may be obtained according to the confession of the accused."He added that "the autopsy of the fifth victim's body has resulted in that the cause of death, stabbic injuries and the accompanying internal visceration and hemorrhagic shock, and his injury may be obtained according to the confessions of the accused in the investigation, and also the autopsy of the victim's sixth victim's body, resulted in that the cause of death was fireburns and that the anatomy of the seventh victim resulted in the cause of death, which is poisoning of carbon monoxide and the consequent failure to breath. The Attorney General, Counselor Hamada Al–Sawi, the perpetrator of the incident, Sherif Abdullah Rajab Mohammed Al–Zayat, was referred "imprisoned" to an urgent criminal trial for committing premeditated murders, to an entire family and set him on fire to their residence on January 5. The doctors of the Department of Forensic Medicine confirmed the existence of injuries to all the deceased except a child of them, and that their death – without the last child – is due to the stabic and severe injuries to them and the accompanying burns; while the rising smoke caused the poisoning of the child from carbon monoxide, which led to a failure to breathe that killed his life
