

Online There have been significant changes in education due to technology. Research has shown that students choose different options, depending on individual preferences, learning styles, and practical considerations. The Internet has played a determining role in transforming the face of education as we used to know it. More and more universities and colleges offer face-to-face and Online course modes or blended versions that combine classroom face-to-face and email, social networking, or synchronous e-learning. In other words, individuals, whose time and/or mobility are restricted, are happier with online courses. On the other hand, a large number of students enroll in face-to-face courses as they feel that face-to-face instruction and communication with peers will help them understand concepts better and learn more effectively. Both groups defend their respective choice wholeheartedly.
