

I started learning English two years ago and I am still learning it. I study it because it is the most widely spoken language in the world, with more than 1.5 billion people speaking it as a first or second language. As for its difficulty or ease, people's opinions differed on that, but for me it was moderately difficult because I do not always practice it, but even when I master the English language, I will not forget the Arabic language because it is our mother tongues. The English language plays a crucial role in improving personal and professional relationships and building trust between individuals. English is a very important language.
