

Flexibility and Adaptability – Common Law: It is more flexible and adaptable to changing societal needs because judicial decisions can evolve over time. Sources of Law – Common Law: The primary source of law is judicial precedents, meaning past decisions guide future rulings. Statutes (laws passed by legislatures) are secondary and interpreted by courts. – Civil Law: It is more rigid and focused on consistency, as changes require legislative amendments to the codes. Courts play a central role in developing the law through judicial decisions, which serve as precedents for future cases. 2.3.4
