

Part Two: Situation of Integration Title: The Power of Dreams and Determination As a student with a positive outlook and a strong sense of determination, I believe in the power of dreams. To make this dream come true, I dedicate myself to my studies, focusing on math and science, and seek out opportunities to learn more about engineering through books, online courses, and hands-on projects. I encourage all my schoolmates to identify their passions, set their goals, and work tirelessly towards achieving them.
