

Poor working conditions for Amazon employees: How can an employee identify and respond to a hazardous work environment? Amazon working conditions In the article, I'm Not a Robot: Amazon workers condemn the unsafe and stressful warehouse conditions reported by The Guardian in 2020, and they show that many employees at the Amazon warehouse confirmed their working conditions were stressful. Employees acknowledge that their injuries have not been given the attention they deserve, and often underestimate the severity of the injuries as the employee's discomfort or pain remains ignored. However, the convenience experienced by consumers is at the expense of the health and safety of Amazon warehouse workers. In 2020, 600 workers signed a petition asking Amazon to implement safer terms of work. It is a huge online company, which is very popular for the variety of its products and the speed with which the products reach the home. Like the brighter lines drawn in the warehouse, which Amazon never implemented. Many Amazon employees admit that workers are fired regularly.
