According to Forbes' ranking of the "10 Biggest Logistics Companies in MENA," Asyad Group, the global integrated logistics provider for Oman, is ranked fourth. Asyad, a $4 billion company supported by a $26 billion government infrastructure investment, is drawing clients and investors eager to take advantage of the nation's cutting-edge logistical hubs and well-established manufacturing capacities.The world-class assets of Asyad Group, which include three of the most productive deep ports in the world, one dry port, two free zones, one economic zone, and an outstanding road network, are what give it a competitive edge. With one of the biggest drydocks in the Middle East and a fleet of more than 80 different types of boats, Asyad provides marine services. The fleet is backed by a network of sea transportation that links Oman with more than 86 commercial ports in 40 different countries.Among Asyad's offerings are its well-known Asyad rapid services, which cater to banking, e-commerce, manufacturing, and other industries. These services range from a 3,000-square-metre first-rate fulfilment centre to last-mile rapid delivery services. By using its wide range of excellent integrated logistics resources and services, Asyad Group has strengthened the Sultanate's position as a major global logistics hub while meeting market demands and enhancing its competitive value offer.
