

Friday, January 10th at 8 pm. It features the UK's most intelligent and talented children all aged between 7 and 12 years old. "And one of the Geography questions was," What are the currencies in Mozambique and Papua New Guinea? The children who take part in the TV show must have very high IQ. The series is 20 episodes long, and the 20 participants test their skills at Maths, Spelling, Geography, Memory, Astronomy, Culture and many other categories. The second season of Genius of the Year is going to be aired on and they should train to answer lots of difficult questions. For instance in the first season, one of the Maths questions was, What comes next in the sequence 1, 3, 4, 15, 17?
