

A celebrity works hard to get the attention of the public and once s/he becomes famous, s/he constantly tries to avoid the attention. As the majority of the world follows the film stars or the sports persons, few of them are crazy about the celebrity. Firstly, let us look at the negative side of being a celebrity. For instance, in the headlines of few newspapers, we keep reading about the fans who write a letter by their blood. Moreover being a celebrity is not an easy job. The film stars and sportsman has to continuously perform well otherwise same fans would harm them. For example, when the Indian cricket team did not perform well in one of the matches, their fans broke the cricketers' houses. Many people dream to become a celebrity so I am confident that the celebrity status must be giving a lot of advantages. It is known that a supermodel earns more than a school teacher. Moreover, anyone can become a celebrity. Being a celebrity is certainly not a piece of cake.
