

This Sysinternals software license agreement, between Sysinternals (a Microsoft subsidiary) and the user, covers the software downloaded from technet.microsoft.com/sysinternals, including updates, supplements, and services. Using the software constitutes acceptance of these terms. The license grants unlimited installation but does not sell the software; Sysinternals retains all other rights. Users cannot circumvent technical limitations, reverse engineer, create unauthorized copies, publish, rent, lease, lend, transfer, or use the software for commercial hosting. Users acknowledge that saved files may contain sensitive information and assume responsibility for its handling. Documentation can be copied internally. The software is subject to US export laws. Support is not guaranteed. This agreement, along with terms for supplements and services, constitutes the entire agreement. US law governs, specifically Washington state law for breach of contract claims, while other claims are subject to the user's state law. Outside the US, the country's laws apply. The software is provided "as is," with no express warranties. Liability is limited to US\$5.00 in direct damages. This limitation applies to all claims and even if Sysinternals knew of potential damages. This may not apply if restricted by local laws. A French translation of warranty disclaimer and damage limitation clauses is included.
