

Everything present around us is our environment."humans in the search of progress have forgotten its value and importance. We are constantly degrading and destroying it. Human activity are the root cause of environmental imbalance. The pollution has lowered the quality of all natural components of environment. The depletion of ozone layer, green house effect, climate. change the very and global warming are issues with which environment is suffering from. In last five decades human have polluted air, water and soil to a extent. large change and If human activities continue to exist like this, then that day is not far away when there will be no more. Even the at all living very existence of all living forms will be wiped away. Besides, what environment has done for us in return we have only degraded it. It is true that we can not can take It is because repay environment but we some steps to save it. our duty to save trees trees provides us oxygen and purify the air present in environment and help regulate the balance of earth."We all need to contribute to save by planting trees, saving trees, saving water reducing plastic usage and by saving all natural resources.Environment plays ?
