

Sure! Solar farms make electricity from the sun. The country has big solar farms that make electricity from the sun, and the Barakah Nuclear Plant helps provide more energy safely. But now, the UAE is also using clean energy like solar power and nuclear energy. The UAE is using more solar and nuclear energy. These sources are better for the environment because they do not run out and do not pollute the air. Here is a simple and easy answer for a 5th-grade student: Where does the UAE get energy from? The UAE gets most of its energy from oil and natural gas. These are traditional energy sources that have been used for a long time. The UAE uses oil and natural gas for energy. The Barakah Nuclear Plant helps produce power. What are the different sources of energy? There are two types of energy: traditional and renewable. Traditional energy comes from oil, gas, and coal, but they can cause pollution. Renewable energy comes from the sun, wind, and water. Key Points: 1.2.3.4.
