

Sarah: Okay, so we have to finish our science project by Friday. Let's make a list of everything we need to do. Emily: Sure. How about we start with the experiment? We need to gather the materials and set up the lab. Sarah: Great idea. After that, we can analyze the data and draw conclusions. Emily: And then we have to write the report and create a presentation. Sarah: Perfect. Let's assign tasks to each other. I can take care of the experiment and data analysis, and you can work on the report and presentation. Emily: Sounds good! Let's get started.
