

I started my professional career on 1\4\2019: Please see below my accomplishment with 3 different groups:

1– Core Service Group: I started my work with CSG by handling cores layout, cores plugging and cores slapping in addition of arranging the cores from iron boxes to pallets. I checked all Groundwater wells washed and unwashed. I participated with the Digitization project by first receiving the request then check the availability of the requested wells through COINS after that i arrange the wells in pallets then take the stick body to transfer the wells to B.3170 for the Geologist finally after they examining the wells I take the wells back to their original shelves and store them. contacted with Halliburton, Exlog, SLB–Geoservices and Geolog to fix some of the boxes 10–I have updated the weekly highlights for DCSG 3 times. I have supported the data entry team with their tasks such as loading the wells archived in B.8806 shelves in database. Saudi Aramco: Company General Use These are my accomplishments for this year:

1– I started Disposal project development unwashed samples I checked and organized all type of wells which include Exploration, Development and Groundwater. I began handling the CWAR requests by checking the availability of the requested samples and the type of the samples if it is unwashed it needs to be washed then doing the subsample if the requested samples is washed it need only subsamples. I have been handling receiving the new wells and put the details of the well in COINS and shared folder and archived the hard copy in physical files and then arranging the boxes from the old pallets to a new one.

2– my productivity for sorting washed samples: 141523

3– my productivity for unwashed samples: 2078

4– my total received wells in daily arrived and sack in coins: 348 wells

5– my total date entry in samples in coins: 30153

6– I wrote 10 near miss report.

9– I taught Mohanad Alzahrani and Mua'ath how to receive and sort the wells on a pallet.
