

1. Unlike digital immigrants, digital natives are accustomed to digital media, including smart phones, mobile apps, and social networks instead of traditional communication, mechanical products, or community centres. Nonetheless, as photography becomes increasingly accessible and affordable, its sacredness and seriousness diminishes. Tsai (2014) indicates that in Taiwan, discarded cell phone accessories including chargers, cords, and batteries, have reached six million units. Electronics manufacturers often sell their devices with accessories included despite the fact that most consumers own unified chargers. Instructions 1. 1.
