

Of course, this experience has benefited me and acquired many things afterwards, and it was Firstly, it is self-confidence, my self-confidence increased after I passed this topic, which was one of the things that affected me so I became fully confident that if I want to evaluate something, I will be able to overcome it with self-confidence, which is the most important thing that I have acquired from this subject. I used this experience, searched for the best educational sites which helped me in developing my skills. Fourthly, my way of thinking changed, so I began to think of many solutions in order to reach my goal. This experience is one of the most important experiences that I have acquired in this topic because you must have good information to convey the information and also to write a scientific research useful to benefit humanity. V, which is that I became a well-known face in my school and began to participate in many works and competitions which benefited me and the school. Secondly, the experience of being a leader.
