

Smart cards are called IC-based cards that accumulate and retrieve information using several computer systems. Smart cards consist of central processing units and memory units. Smart cards work effectively by saving information about the users. This makes these cards the best option for different applications. In addition, smart cards enable different services and options to the user through the application linked to. So by having this card, one can use the data and save it and manipulate it, in this reason we target the student and teachers in the university in the education sector. The card will offer several services and enable the communication between the student and the teacher. The Smart Card Works by connecting the card to the app by scanning the barcode in the card and entering the ID number and the password of the student and teacher, the card will automatically fetch information from the blackboard and pass the information to the app. The smart card application makes it easier for a student to obtain university information through any device containing this application. You can access the card and its features by downloading the app through the App Store or Google Play. After downloading the app, you will be asked to open the app, scan your barcode and enter your ID information that is linked to your ID number. Smart cards can be used to grant different kinds of access, which could be incredibly useful on a campus. Physical access allows students to access particular buildings and restrict access to others, such as staff areas. Not only is this good for safety and security of where students are, but also means that students have access to the facilities that they need to complete their course. Our target audience will mainly be the student and teachers because this app was created to make the life of the university much easier. We got the idea of a smart card for what we see of a difficulty for students in terms of access to books, university information and other things that students may need. The smart cards help easily and quickly gain access to facilities on the campus and this is one of the main reasons why we suggest implementing a smart card system, and use the smart card will save time and effort to students and teachers that take attendance, and enable students to know about any change or update in their course and other. Also, the smart card helps create a digital university environment that serves the university community and supports vision of our community.
