

With 18 years' experience in Qatar, including seven years representing the Ministry of Qatar and Ashghal on five major projects (two Doha expressways, two sewer projects, and a stormwater project), I've cultivated strong relationships with key personnel across various departments, including Drainage Affairs, MOI, Ooredoo, Civil Defence, and Kahramaa. My 11+ years at Energy City Qatar involved overseeing all projects, monitoring sub-developer and contractor infrastructure work, coordinating with Lusail, Kahramaa, and PWA, researching utilities, and generating regular progress reports. Throughout my career, I've collaborated extensively with management firms and consultants, addressing contractor claims, EOTs, and variations on numerous projects.
