

Emirates Global Aluminium (EGA) Report Introduction and Background Emirates Global Aluminium (EGA) is a large company in the UAE. It follows strict safety rules to protect workers and prevent accidents. It produces aluminum, which is a strong and light metal used in buildings, cars, and many other products. The company has factories in Abu Dhabi and Dubai. EGA is important to the UAE because it helps the economy and creates jobs for many people. It sells aluminum to many countries, helping the UAE grow. – Importance to the UAE: EGA is one of the biggest companies in the UAE that is not related to oil. My skills from ADVETI, like operating machines, teamwork, and safety knowledge, will help me do my job well. It offers good job opportunities and a safe work environment. I am interested in learning more about aluminum production and working with advanced machines. – Safety Record: EGA cares about safety.
