

Mobile phones are one of the most commonly used gadgets in today's world. You get the chance to use social media and play music through it. Moreover, we see how mobile phones have replaced computers and laptops. Now, our lives revolve around it. They come in use for communicating through voice, messages, and mails. Most importantly, we also click photos and record videos through our mobile's camera. We carry out all the tasks through mobile phones which we initially did use our computers. We can even make powerpoint presentations on our phones and use it as a calculator to ease our work. They are becoming dumber while using smartphones.
