

o Post-SIEM Implementation Strategies to Strengthen Security to enhance Bahrain Tech Solutions' security posture:

- o Regularly updating security threats: Can enhance efficiency by reducing false positives and ensuring their relevance.
- o Enhancing Security Posture: SIEM tools enhance security by detecting and mitigating threats before they can cause significant damage thereby reducing the risk of major breaches.
- o Integrating threat intelligence: Incorporating up-to-date threat intelligence from various sources to recognize new vulnerabilities and attack patterns.
- o Automation and Incident Response: Automation helps speed up the investigations and the consist and reliability of response process.
