

The comic begins by giving us a shot of a rainy, bleak Gotham. Then Bruce jumps into the river and sees a body floating, which makes Peacekeeper 1 believe that it is Bruce and shoots until he is sure that he is dead, and then Bruce is able to get out of the river, and this explains to us why people thought that Bruce was dead, and then the comic takes us back to The present where Bruce has just defeated the cyber that was attacking the teens and then he changed into the bat suit and took some of the cyber parts with him, then we see Bruce returning to his new place which is a crappy apartment and it is the only house in Gotham that still uses a physical key to open the door, and He rents a room from a crazy old man and this man calls Bruce Jeff because of course Bruce will not tell him his real name. He was knocking on the door for a surgeon to stitch up his wound, and when the surgeon agreed and began to stitch up his wound, the next day we see Peacekeeper 1, the one who shot Bruce, issue an announcement to the media and tell the population that when Gotham City with (the magistrate) made a promise, and here he stands before them as a man fulfilling a promise and tells them that this morning, Batman killed Gotham's most cruel rebel, while his death is a victory for justice and Gotham, and other people were eliminated as well, and the Peacekeeper 1 announced his death. Later we see some teenagers stealing the barrels and the cyber follows the teenagers and tries to catch them, but of course Batman is watching all this and swoops in to eliminate them and save the teenagers, then we get flashbacks of the past, we see Peacekeeper 1 chasing Bruce after the guard shot him. The corks contain blueprints and newspaper clippings, after which Bruce wears a Batman suit and heads towards Plexi Tech, which is one of the newest companies in Gotham. Currently, at the magistrate's headquarters, Batman saw that Hannah had not She listens to him, but tries to get the evidence. When Bruce arrives at the specified location, he grabs nano-drones and takes them to explain them.
