

have diabetes, but I do not let it stop me from reaching my goals. Basketball is fun and teaches me teamwork, discipline, and staying active. I also love flowers of all kinds and colors, as they make me happy and inspire me. In the future, I want to study Business Administration. I also love mathematics because it makes me think logically and solve problems. Math is like a puzzle that is both fun and challenging. I try to balance my studies, hobbies, and personal life. I organize my time so I can enjoy both work and fun without feeling stressed. I am already trying to improve these skills. My hobbies include playing the piano and basketball.
