

Rocky Mountain: Rocky mountain it is characterized by several things, like Glaciers, mesmerizing blue lakes, mighty waterfalls, and snow-capped mountain peaks offer an unparalleled number of activities. For this reason, mountains attract hikers, climbers, skiers, and water sports enthusiasts from across the globe. Here you can find everything from desert cactus to an ice field, so there are many animals at the mountain like Grizzly bears, elk, moose, mule deer, mountain goats. Logan Mountains: Canada's highest peak is also the second tallest peak in North America after the United States' Mount Denali, and this is some of the animals in there: mule deer, mountain lions, wild turkeys, coyotes. Laurentian Mountains: Laurentian Mountains. The range was gradually scoured and worn down and now forms a rocky peneplain (a vast erosional plain) and this is some of the animals in there: black bear, bobcat, raccoon, grey wolf, otter, moose.
