

We all know that technology plays a significant role in the teaching and learning process. Uses chants, rhymes, and songs to develop preschool children's awareness. Doodle Town uses audio, video, and hands-on activities to stimulate and inspire learning. In global communities where English is a universal language of communication, knowledge of other languages is very important. Legal English is the world's first legal Podcast– It includes online learning materials and quizzes for learning. As nowadays, teachers combine digital media with more forms of teaching. Technological innovations are a part of education. Only the innovations which have solid teachings will stand with time. As we all know that there are lots of mobile-friendly apps available. Wordable turns vocabulary learning into fun. English Essentials uses mobile technology to provide free resources for teachers and students. Learners need to be physically and intellectually engaged. It also motivates young learners to create and draw. There are a lot of online teaching resources also available. These apps can be a great form of learning. Then Get set Go! Embodied learning is also based on the idea that learning is not just remembering. It involves both mind and body.
