

ts broadest fee, political sociology is concerned with the relationship between politics and society. Its distinctiveness within the social sciences lies in its acknowledgement that political actors^ including 265\* عpressure groups and social movements●●\*● ز within ●wider social context. Political actors therefore inevitably shapef and 70 turn are shaped by, social structures such as●مرهلهوetc. Such social structures ensure that political influence within society is unequal. It follows from this that ●key concept in political sociology is that power, where power ءdefined as the capacity to achieve one's objectives even when those objectives are in conflict with the interests of another actor. Political sociologists therefore Invariably return to the following question :which individuals and groups in society possess the capacity to pursue their interests, and how is this power exercised and institutionalized
