

Ladies and gentlemen, Good morning It is with great enthusiasm and excitement that I stand before you today to share my thoughts and findings on my wonderful journey with wro. The competition tasks us with designing, building, and programming robots to tackle real-world challenges—a feat that requires not only technical prowess but also ingenuity and imagination. Firstly I'd like to extend my thanks to God Almighty, then to the Custodian of the Two Holy Mosques King Salman may God protect him, and His Highness the Crown Prince Mohammed bin Salman, and I thank my homeland, the Kingdom of Saudi Arabia. In the heat of the competition, as we watched our robots navigate intricate mazes, conquer daunting obstacles, and complete complex tasks, we were reminded of the power of teamwork and the boundless potential of human innovation. It is my sincere hope that my journey in robotics serves as a source of inspiration and encouragement to all those who dare to dream of a better world—a world where robots not only reflect our humanity but also help us to realize its fullest potential. I am deeply honored to have this opportunity to share with you the incredible experience of participating in the World Robot Olympiad (WRO) competition—a journey that has been nothing short of exhilarating, challenging, and immensely rewarding. But with perseverance, collaboration, and unwavering determination, we overcame each challenge, emerging stronger and more united as a team.
