

The key stakeholders of Tesla include: 1. Government and Regulators – Entities that oversee industry regulations, safety standards, and environmental compliance. Environmental Groups – Organizations concerned with Tesla's role in promoting renewable energy and reducing carbon emissions. Customers – Buyers of Tesla's electric vehicles, solar products, and energy solutions, who value innovation, quality, and sustainability. Communities – Local populations near Tesla's factories and operations, affected by environmental and economic impacts. Suppliers – Companies that provide raw materials, components, and services essential for Tesla's manufacturing and operations. Owners/Shareholders – Investors who own shares in Tesla and are interested in the company's profitability and growth. Employees – Individuals working at Tesla, including engineers, factory workers, and corporate staff, who are concerned with job security, wages, and working conditions. 2. 3. 4. 5. 6. 7. 8.
