

In this paragraph, we will talk about the harmful consequences of the company Apple and what the literature says about this violation. The loss of some parts in the iPhone 14 phone due to its replacement, especially the battery, and this is a high cost, but a company cannot ask customers for the price of the battery because the phones contain a warranty, and this protects customers in the event of replacement so that it does not pay the costs of replacing the battery, and also that these losses will affect Apple employees, as they will work extra hard and hours to make repairs on these devices, and it forces Apple to give its employees additional pay because they work harder. Apple's reputation among people was also affected by the participation of iPhone 14 users, each other, their battery, performance and phone experiences in general, and they concluded that the iPhone 14 is the problem that the device's battery runs out quickly even if the screen is not used, and for this reason some Apple's customers will go to competitors such as Samsung since the prices of Samsung phones are lower expensive and have similar quality to the quality of iPhones. Apple's reputation among people was also affected by the participation of iPhone 14 users, each other, their battery, performance and phone experiences in general, and they concluded that the iPhone 14 is the problem that the device's battery runs out quickly even if the screen is not used, and for this reason some Apple's customers will go to competitors such as Samsung since the prices of Samsung phones are lower expensive and have similar quality to the quality of iPhones. It is that the percentage of charging decreases very quickly, even if you did not use it. This led to a decrease in sales because of the defect that was in the iPhone 14 battery. It is that the percentage of charging decreases very quickly, even if you did not use it. This led to a decrease in sales because of the defect that was in the iPhone 14 battery. Despite these harmful results, Apple must continue in the market with other products in order to overcome these harmful results. In this paragraph, we will talk about the harmful consequences of the company Apple and what the literature says about this violation. Despite these harmful results, Apple must continue in the market with other products in order to overcome these harmful results. Wasting time because the iPhone 14 has not been well made since the beginning of the release, and we know that time management is very important in the production of goods and services, as we know, the more the company has good time management and it will become more efficient and effective. This resulted in a decrease in sales due to the defect that was in the iPhone 14 battery. This resulted in a decrease in sales due to the defect that was in the iPhone 14 battery. At the beginning, the purchase of the iPhone 14 made reviews about its performance. At the beginning, the purchase of the iPhone 14 made reviews about its performance. As we know that the higher the sales, then the profits will increase the percentage of Apple's share in the market and increase the share price in the market. As we know that the higher the sales, then the profits will increase the percentage of Apple's share in the market and increase the share price in the market. When Apple released the iPhone 14. This depends on Apple's sales and profits. When

Apple released the iPhone 14. This depends on Apple's sales and profits.
