The last is the researcher would analyze the data by using the existentialist approach.According to Goetz and Le Compe 1982:32, Validity in research is concerned with the accuracy and truthfulness of finding.For analyzing the data, the researcher used content analysis by using an existentialist perspective.Based on Creswell (2007) there are some steps to analyze the data, such as: a. Organizing and preparing the data for analysis.d. Use the coding process to generate a description of the setting or people as well as categories or themes to analyze.Factors that are

Contribute Annie Sullivan chose teaching as her choice of life Based on the underlying theory and match with the story, the researcher found that some factors contribute to Annie Sullivan to choose teaching as her choice of life.As follows: a. She wanted to assist Helen Keller to get the education Annie Sullivan was lost much of her sight due to a trachoma disease contracted as a child due to poor living conditions in the 1870s.Trachoma is an infectious disease caused by the bacterium Chlamydia trachomatis.This infection causes a roughening can led to pain in the eyes, breakdown of the outer surface or cornea of the eyes, and eventual blindness.Annie Sullivan wanted to help Helen Keller to make an association between the word and physical objects since actually, she wanted to bring education to everyone even a blind, mute, deaf student such as Helen Keller.

Advance how the description and themes are represented in the qualitative narrative.Jimmie Sullivan, who suffered from a tubercular hip, was terrified of being separated from Annie, so she dressed him as a girl and kept him with her on the women's ward for a time, promising to take care of him forever and ever.There is the sense at the end of the play that in 8 reaching Helen, Annie Sullivan was found the resurrection she seeks and that she will be able to love and care for Helen Keller in a way that she was not able to do for her brother.When Annie Sullivan was five years old, she contracted a bacterial eye disease known as

trachoma. Dr. Muhammad Thoyibi, M.S. () (First Examiner) 2. Titis Setyabudi, S.S., M.A. () (Member I of Examiner) 3. Dr. Abdillah Nugroho, M.Hum.
