

The study of astronomy is my dream career and my goal in life. To achieve my goals, I plan on obtaining a graduate degree in aerospace engineering. For the Long-term career goals, I plan to learn and specialize in aerospace engineering and obtaining M.S and PhD and to participate in internships and gain hands-on experience in the field. Furthermore, I plan on building a strong network within the industry, attending conferences, and participating in research projects. I have always been fascinated by aeronautical, astronautic, and space exploration. In the short-term I need more understanding of the science field and further knowledge.
