

first, if we use the solution of plastic and reduce plastic consumption, consider the following: Carry reusable bags: Bring your reusable bags when shopping instead of using single-use plastic bags. Say no to plastic straws and utensils: Opt for reusable alternatives like metal or bamboo straws and utensils., second, if we use this solution to support businesses that are reducing plastic waste and helping the environment Plastic recycling reduces the need to extract new, raw materials from the earth as it reuses the stuff that's already processed and protects natural resources. finally, if we use this solution by highlighting success stories or community efforts can inspire people to join the movement, Sharing success stories raises awareness about the impact of plastic on the environment and showcases tangible examples of positive change.
