

At Toys Inc. Not taking vacation hurts you and the company. Tired employees are more likely to have accidents and get hurt. You are very skilled woodworkers. Vacations improve the work you do. You have more energy. Next year we will start a new vacation policy because you need to take your vacations. We know you work hard, and we believe vacations are the best way for you to rest and relax. Every time an employee gets hurt or sick, we produce less. Every time a person gets hurt or sick, the co-workers need to work harder to do their work, too. Vacations are good for business because they are good for employees. Please read about the two policies. Please return your email with your choice by the end of the day Friday. They check the company email. Closing the company solves this problem. We want you to be happy, healthy, and successful employees. Many of you, however, do not use all your vacation days. Some of you don't take vacation at all! We don't want to lose you! You produce more.
