

The flagship authentic Arabian sand desert protected area'. Sustainable management and development: Address impacts from waste, litter, pollution, rehabilitation of decommissioned developments, resource efficiency and climate change 7. Conservation and ecosystem management: Restore and maintain (within the environmental variability) the areas ecological ecosystems and biodiversity condition. Our mission is to establish an effectively conserved area within the Empty Quarter, globally renowned for its wilderness and vast desert dune landscapes. Local communities are supported in diversifying their economies through sustainable tourism and are no longer dependent on the limited vegetation within the Reserve. Community and visitor support and awareness: Ensure that communities & visitors are fully aware of rules, regulations, agreements, responsibilities, and opportunities within the PA. 5. Sustainable tourism rapidly thrives within the established LACs. Retain UNESCO registration as a WHS. 2.3.4.6.
