

As World Link International's Logistics Officer in Al Hudaydah, Yemen, I oversaw all logistical operations, including transportation, storage, and distribution, successfully collaborating with partners. Securing three consecutive WFP warehouse management tenders significantly enhanced the company's profile. I also streamlined WFP reporting via Excel, resulting in a 40% accuracy increase and 30% faster processing. This experience provided crucial humanitarian logistics expertise, enabling me to develop and implement solutions to complex operational issues in a challenging environment.
