

The text describes the development of the Rorschach inkblot test, a psychological assessment tool. It begins with the test's creation in 1921 by Hermann Rorschach, who named it "Psychodiagnostik." The text highlights key figures who contributed to the test's refinement, including Oberholzer (1922), R= (1924), Beck, Levy, and Klopfer (1936). It also notes the establishment of the Rorschach Research Exchange in 1948. The text further mentions the involvement of Davidson in 1939, suggesting his contribution to the test's evolution.
