

The study aims to identify the ways through which "mechanisms can leverage the green economy" with tourism acting as a source of sustainable economic growth within urban landscapes (contemporary urban planning, historical patrimony). " Research Terms: Definition of terms used in the study: –1

Tourism Defined as the temporary movement of people to destinations outside their usual places of residence, offering leisure experiences and services provided by the host destinations (World Tourism Organization, 24), the term encompasses a wide range of activities and is a significant sector in the global economy due to its capacity to generate income, employment, and the possibility of promoting cultural and environmental conservation (Smith; Tourism Analysis).
