

10,000 jobs created following the opening of 262 economic enterprises. The activation of 262 economic enterprises in the wilaya of Blida will reduce the number of unemployed with the creation of 10,000 workstations, including a large number among new recruits are university students or graduates of professional training centers. Thus, the year 2024 will be marked by a viable economy offering a societal balance favorable to a good recovery in the wilaya of Blida. Among these new economic enterprises, it is worth mentioning the hundred factories whose activity has resumed after several years of freezing following a dispute linked to the existence of a pipeline which crossed this industrial zone and which imposed a safety distance of 75 meters on either side of the gas pipeline, making it impossible for companies located in this area to work. Once these reservations were lifted and business leaders received final authorization to reopen their factories from the wali of Blida, they were able to free up a large number of job positions to the great delight of the unemployed. The positive repercussions on the economy in the wilaya will have the advantage of relaunching other financial activities, through the tax revenues collected via these companies. These financial activities will in turn create new jobs and, consequently, reduce unemployment efficiently. newly created.
